INTERNSHIP CERTIFICATE

This is to certify that Mr. Avinaash. A has successfully completed his internship in the domain of Embedded Systems and EV charging technology at chargeMOD from 26.05.2025 to 30.6.2025.

During the internship, Avinaash has received comprehensive hands-on training in embedded system applications specific to EV chargers. The program included exposure to various aspects of Embedded system development, including microcontroller programming, interfacing peripherals and hardware design encompassing schematic preparation, PCB layout, and an understanding of the fundamental principles of EV chargers. he actively participated in the assembly and testing of both Level 1 and Level 2 AC chargers, gaining valuable practical experience and insight into their working and architectural design. His performance throughout the internship was commendable, and he contributed effectively to the tasks assigned to him.
